Measure for measure.

Taking measurements is one thing. Keeping them accurate is quite another. Both are now effortlessly possible with professional measuring and marking tools from Prym: Omnigrid rulers allow easy handling of fabrics and patterns. Practical and ergonomic tools help reliably transfer measurements onto the fabric.

As with all Prym products, the materials and workmanship in this assortment must also meet stringent standards: precision is as much a priority for the rulers as is a good grip for the marking tools.

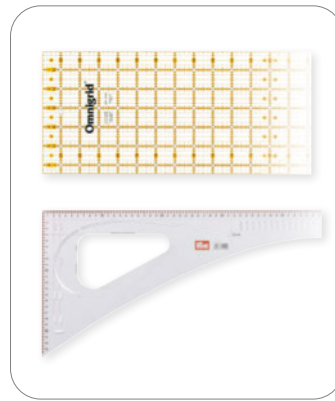

prym.ergonomics

Thanks to its ergonomic design and non-slip materials, this product range ensures everything is well in hand.

Tape measures

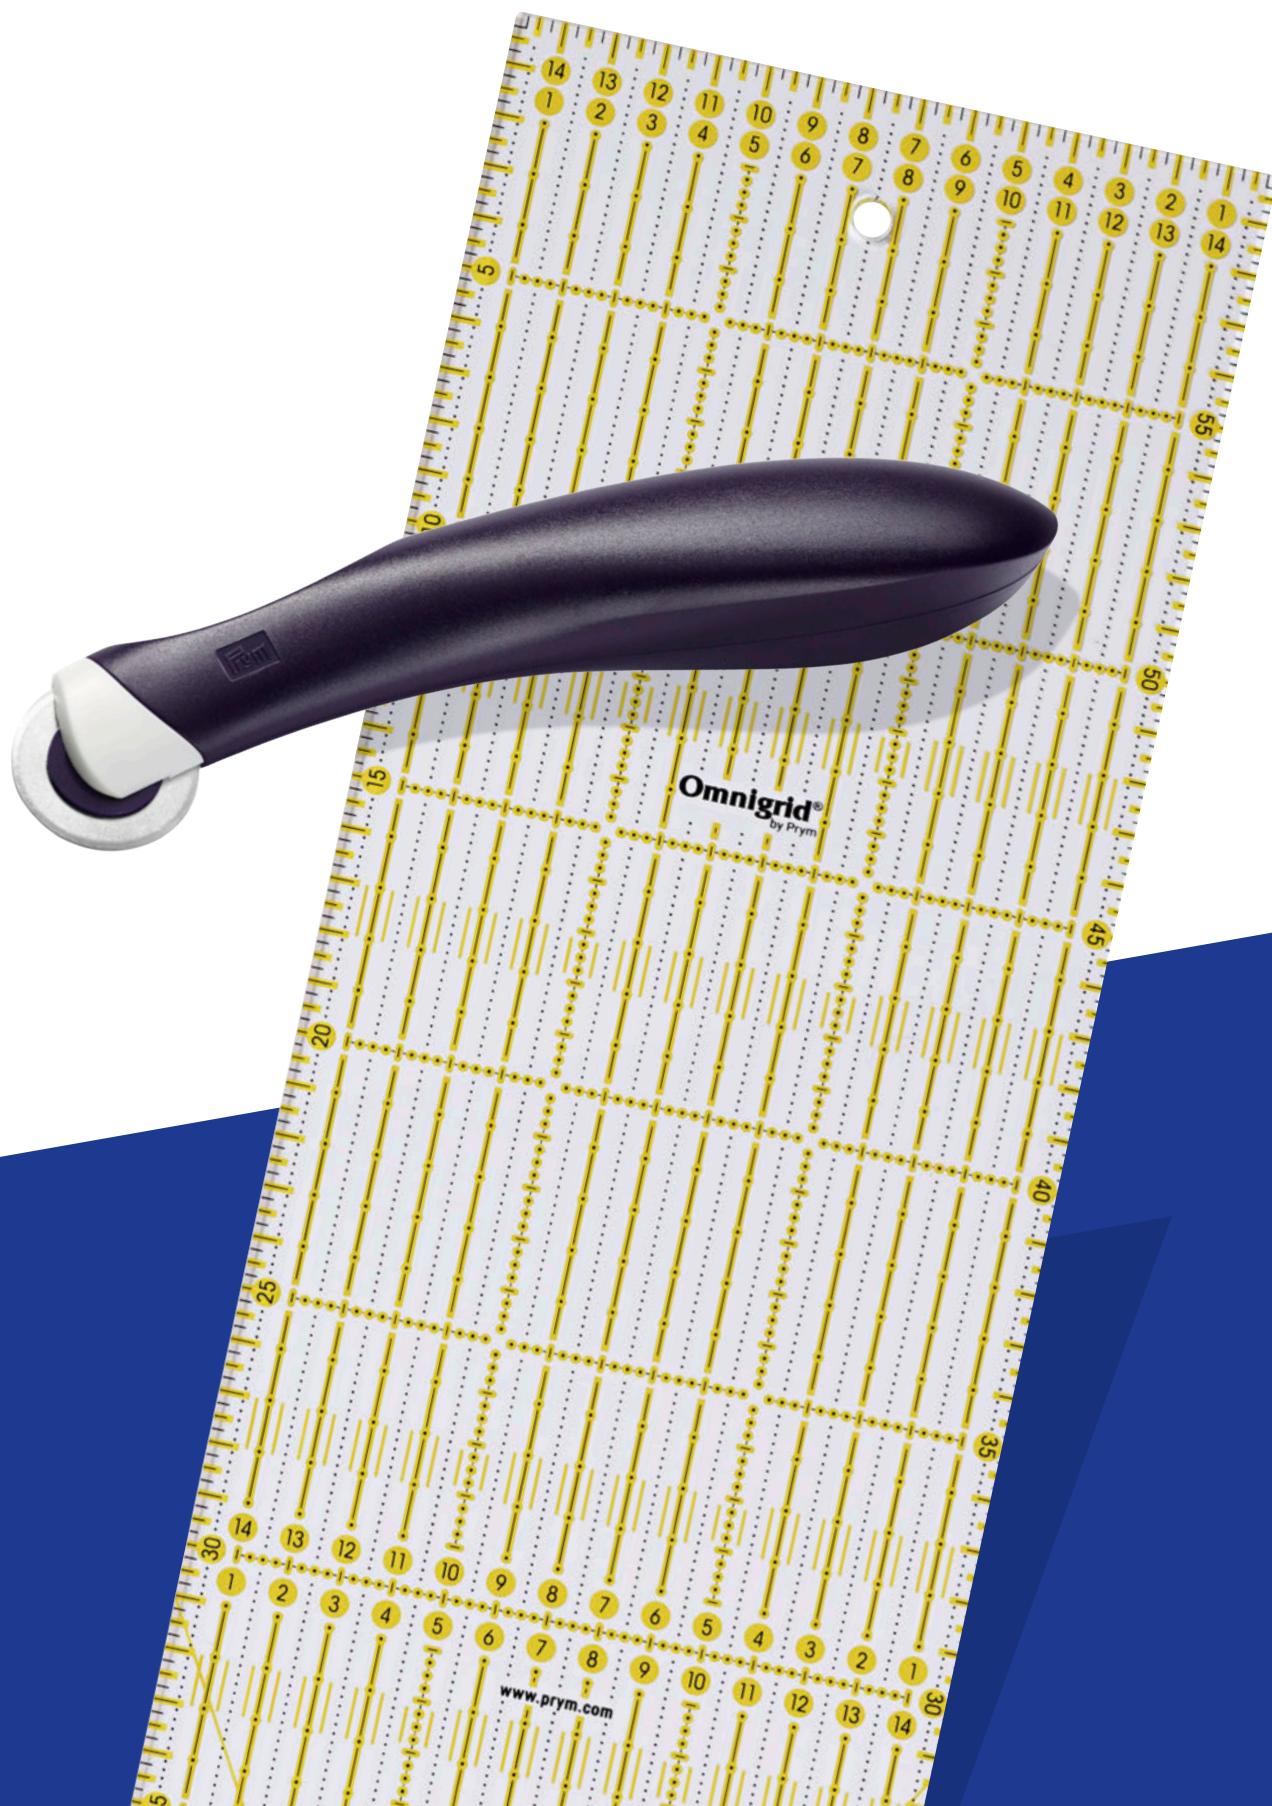

Due to polyfibre material, tape measures from Prym are highly flexible and yet absolutely dimensionally stable. Precise imprints are the prerequisite for equally precise measurements, thanks also to the end caps fitted with millimetre precision.

Rulers

Whether sewing or patchwork – the Prym range of products provides the perfect ruler for every requirement. Transparent rulers make it easy to take measurements on light and dark backgrounds – without distortion and highly precise thanks to lasered markings. Thick and robust material helps steadily guide rotary cutters and art knives. The combination of all these qualities makes Prym rulers unique.

With quality, you make the best cut.

Utmost care and many decades of know-how are the ingredients used in the production of Prym sewing scissors and tailor's shears. They offer maximum precision and cutting accuracy from the screw joint to the tip – whether cutting jersey, denim, silk or linen. In fact, Prym has more than 400 years of experience in the technique of cutting.

Cross-sectional view

Deep insertion of the metal ends into the soft handles provides for balanced dimensional stability.

The soft handles

The soft handles offer outstanding ease of use due to their ergonomically shaped eyes. Fingers therefore have ample space for fatigue-free work without any pressure points being left behind.

The finish

The precise finish right up to the tips guarantees excellent cutting results.

The blades

The blades of high-quality stainless steel are assembled and ground in such a way that squeezing or crushing of the fabric is impossible.

Screw and thread

The blades are joined by a screw and thread which prevent them from working loose, so that even if they are used intensively, they are guaranteed to have a long life and cut with the same top quality.

Scissors and other cutting tools

Dressmaking scissors 'Professional'

curved 13,5 cm

textile scissors, standard handles; when using several layers of cloth, the rounded tips ensure that only the top layer is cut
